

PORTABLE SINGLE GAS DETECTOR

The AGH5100 & AGH5100M portable gas detector can detect toxic gases in the ambient environment. The product is fully gripped, compact, and a built-in advanced electrochemical sensor for a fast response. The double-layered body design suitable for harsh environments and single-button operation greatly reduces the possibility of misoperation.

Features

- Compact and light, it is easy to wear in a helmet, belt, etc.
- PC+TPU double-layer body, wear-resistant and drop-resistant, suitable for harsh conditions.
- Specially designed PCB board, effective against electromagnetic interference, stable work.
- High-brightness LCD display, sound, light, vibration alarm method.
- Built-in high-performance lithium-ion battery for over 20 days of operation.
- One-button design, easy to use, reducing the possibility of misoperation.
- Compatible with a external sampling pump for confined space usage.

Dimensions

PORTABLE GAS DETECTOR

In the daily production of petrochemical engineering, steel, and chemical engineering industries, workers often encounter with flammable and toxic gases of various sorts, and accidents are easy to take place without proper safety protection. As a kind of personal safety protection instrument, portable gas detector plays an important role in industrial production safety.

The portable gas detector is small in size and easy to carry. It can be used for workshop routing inspection for side leakage, as well as in confined spaces such as flame operation inspection.

diffusion type gas detector

build-in pump gas detector

external pump gas detector
